

5kg CO2 Fire Extinguisher Cabinet

Product Specification Sheet

FireShield

Key Features

- Designed to accommodate a fire extinguisher up to 9kg or 9 litres, including 5kg CO2
- Manufactured with polypropylene
- Fully weather sealed
- Resistant to chemicals
- Brilliant shock resistance
- Innovative internal clamp system

An internal clamp and strap system holds the fire extinguisher securely in place, with suitability for most shapes and sizes. It can also be removed where needed for enhanced versatility.

Manufactured with polypropylene to provide extreme durability, able to withstand knocks, bumps, and dents to provide superior protection. Weatherproof seals allow use in extreme environments, offering protection from moisture entering the cabinet.
