

Includes important upgrade options & extra marketing tools

# Introduction

Welcome to the new Fire Safety Stick catalogue! As you will see we have recently revised the "Upgrade Packs". These revisions are as a result from our own research, plus direct feedback from yourselves and the users. Particularly, as we move into new sectors, the requirements of the installations need more than just the standard Fire Safety Sticks.

Of course, in the majority of cases, the standard units (FSS50 & FSS100) are ideal, but we would strongly recommend that you do offer the new Utility versions as well as the revised Fire Safety Stick PRO to your customers, as their needs may be different. We have tried to demonstrate in this catalogue just some of the different locations that these are suitable for.

If customers are looking for the PRO versions, you should find out more where they intend installing the sticks, for example in commercial vehicles which are not governed by the transport of dangerous goods (ADR) or public service vehicle (PSV) regulations, then the Fire Safety Stick PRO should be fine. Are they considering the FSS for their commercial premises? In which case, if they wish to replace their existing traditional extinguishers, then this is much more involved. We strongly recommend they read this web page to understand their obligations should they want to consider it, or follow this QR code:  
<https://fss.link/workplace>

Are you aware of the many, fully verified case studies and success stories on our website? We have a small selection further in this catalogue, but please visit this website to see more details - they are great to share with your customers. Just follow the link below or scan this QR code on your mobile.  
[firesafetystick.com/case\\_studies](https://firesafetystick.com/case_studies)

Here are some of the notable organisations that have reviewed and installed the Fire Safety Stick for their own use:

**Kent Fire and Rescue • South Yorkshire Police • The Post Office • Siemens  
• BBC • Cadent Gas • Silverstone Track Experience • Mercedes Benz •  
Babcock • AGCO • Socotec • Toyota • BMW • Honda  
...and there are more coming soon!**

# Models and Upgrade Options

## Standard - Domestic Use Models

**FSS50 - Standard Domestic-use model**  
(50 Second discharge time)

**SKU: FSS50**

Includes: 1x Mounting clip

**Price from UK Importer:**  
Please refer to your agreement discount levels

**FSS100 - Standard Domestic-use model**  
(100 Second discharge time)

**SKU: FSS100**

Includes: 1x Mounting clip

**Price from UK Importer:**  
Please refer to your agreement discount levels

The standard FSS50 and FSS100 are typically ideal for general domestic use. However, depending on the environment that they are being stored in (e.g. heavy vibrations in some vehicles), then these new options may be better. These include the Utility Pack (also known as Agri-pack for agriculture machinery installations), and the Fire Safety Stick PRO versions. The PRO versions are intended for commercial or non-domestic installations.

We would recommend ordering the Utility and PRO options fitted as you buy the sticks. We can then install all the extra stickers, clips and fit the tamper-tag, making it much easier for yourself.

Alternatively, you can order the upgrade packs for you or your customer to install the items themselves retrospectively.

# Retro-Supplied - Upgrade Options

These are supplied loose and are intended for the user/reseller to fit themselves, to previously purchased sticks. Each upgrade version is suitable for both FSS50 and FSS100, no need to specify which stick it is to be the applied to later.

## NB DOES NOT INCLUDE THE FSS

## How to fit the tamper tag yourself

Fitting the tamper tags yourself is very easy. You just need a regular electric drill, with a drill bit producing a 3mm diameter hole in the plastic handle and another hole in the striker cap. Follow this link or scan this QR code to watch a very short video to explain exactly.

<https://fss.link/TagFitting>

### Utility Upgrade (a.k.a. Agri-Pack)

Typically used for non-commercial vehicles in extreme conditions

**SKU: UTY-UP**

Includes: 1x extra mounting clip (so the user will have 2x clips in total) and a loose tamper tag.

**Unit Price from UK**

**Importer: £2.20 plus VAT**

### PRO1 Upgrade Kit (No sign)

Typically used for commercial vehicles with no space for a sign)

**SKU: PRO1-UP**

Includes: 1x extra mounting clip, loose tamper tag, install and maintenance stickers, free download of log sheet.

**Unit Price from UK**

**Importer:**

**£2.50 plus VAT**

### PRO2 Upgrade Kit (with vinyl sign)

Typically used for commercial vehicles

**SKU: PRO2-UP**

Includes: 1x extra mounting clip, loose tamper tag, install and maintenance stickers, free download of log sheet and vinyl self-adhesive sticker sign

**Unit Price from UK**

**Importer: £5.00 plus VAT**

### PRO3 Upgrade Kit (with Rigid Sign)

Typically used for Commercial Building use\*

**SKU: PRO3-UP**

Includes: 1x extra mounting clip, loose tamper tag, install and maintenance stickers, free download of log sheet and rigid photoluminescent sign

**Unit Price from UK**

**Importer: £15.00 plus VAT**

\* Please ask for more information on guidelines for commercial building installations

# Fitted Upgrade Options

These kits include the corresponding FSS Stick - please use the correct SKU for the FSS model wanted - You do not need to order the sticks separately. The pricing is based on your contract discount level for the stick PLUS the extra shown here to be fitted to the sticks.

## FSS Utility Pack (a.k.a. Agri-Pack)

Typically used for vehicles, farm, plant machinery in extreme conditions

SKU: **FSS50-UTY** or **FSS100-UTY**

Includes: selected FSS, 2x mounting clips in total and a fitted tamper tag

Extra price added to reseller's contracted stick price: **£3.20 plus VAT**

## FSS PRO1 Commercial use (with No Sign)

SKU: **FSS50-PRO1** or **FSS100-PRO1**

Includes: selected FSS, 2x mounting clips in total, a fitted tamper tag, install & maintenance stickers, FREE download of log sheet. NB No signage is included

Extra price added to reseller's contracted stick price: **£5.00 plus VAT**

## FSS PRO2 Commercial/Vehicle use (with vinyl sign)

SKU: **FSS50-PRO2** or **FSS100-PRO2**

Includes: selected FSS, 2x mounting clips in total, a fitted tamper tag, install & maintenance stickers, FREE download of log sheet and vinyl self-adhesive wall sign.

Extra price added to reseller's contracted stick price: **£7.50 plus VAT**

## FSS PRO3 Commercial/Building use\* (with rigid sign)

SKU: **FSS50-PRO3** or **FSS100-PRO3**

Includes: selected FSS, 2x mounting clips in total, a fitted tamper tag, install & maintenance stickers, FREE download of log sheet and rigid photoluminescent wall sign.

Extra price added to reseller's contracted stick price: **£17.50 plus VAT**

\* Please ask for more information on guidelines for commercial building installations

# Selection of Case Studies

**"£80 Fire Safety Stick just saved a £650k combine!  
Idler bearing went, started fire, Fire Safety Sticks are a  
must have!"**

**Yet another brand-new combine harvester is saved by the Fire Safety Stick.**

Richard Cobbald, Farm Manager at Bartlow Estate, Cambridgeshire, was so impressed that he quickly shared the news on his regional farming WhatsApp group! Richard explained just what had happened that day during the 2024 harvest season. One of his team were operating the combine, when upon changing direction, they were able to see smoke coming from the left side of the machine. Fortunately, having the Fire Safety Stick immediately available in the cab, he was able to grab it and head back to the side which housed all the pulleys. Moments earlier, he had gone to the side of combine opened the side panel to investigate the source of the smoke., although the fire was still in its very early stages, it had already melted the idler pulley for the main bearings. Luckily the Fire Safety Stick very quickly extinguished the fire. One of the key comments we get from the farmers, is that they like the Fire Safety Stick because it has such a low discharging pressure that it doesn't blow the combustible dust everywhere, potentially spreading the fire further.

With the fire soon out, it then allowed the operator to the douse the area with water cooling the area down further thereby preventing any further damage from the high temperatures allowing a fire to re-ignite. (If he had the 100second model, that would have sufficiently cooled with the need for water.)

Richard added, that they lost just half a day having the minor repairs done. Without the Fire Safety Stick it would have cost the estate a significant cost in increased insurance premiums as it was likely the combine would have been a write-off, let alone the lost time in harvesting at a crucial time. Plus of course, the risk of a burnt field of crops too.

**Without doubt that £80 spent on the Fire Safety Stick was a great investment for Bartlow Estate!**

**See the full story and video interview: [https://firesafetystick.com/bartlow\\_estate/](https://firesafetystick.com/bartlow_estate/)**

# Selection of Case Studies

## Fire Safety Stick and quick-thinking motor-homer stops a disaster!

**"Hi, I wanted to say how good the Fire Safety Stick was, this evening whilst out in our motor-home enjoying an early evening BBQ. We heard a bang and a scream from a neighbouring caravan"**

The owners, a couple who escaped unharmed, alerted surrounding residents to the situation, the neighbours elected to help with their traditional extinguishers, and disconnecting the mains and isolating the gas. One of the extinguishers used was a foam extinguisher, but unfortunately, the traditional extinguisher/s had little to no effect on the fire. The fire was at the back of a fridge and behind an external vent/grill, in a cavity. Clive B, the owner of a Fire Safety Stick heard the explosion and he quickly realised that the traditional extinguishers, that had been used before he arrived, were not able to reach the fire, he then proceeded to activate his FSS100 and successfully extinguished the fire. This was achieved because the vapour from the Fire Safety Stick was able to weave its way into the cavity and reach the source of the flames, whereas a traditional extinguisher needed a direct line of sight/attack.

Without the Fire Safety Stick, there is no doubt their caravan would have been totally destroyed and more than likely others nearby too, instead there was just superficial damage that could have been repaired.

Further details online at:

<https://firesafetystick.com/fire-safety-stick-puts-out-gas-explosion-fire-in-caravan-park/>

Scan this QR code to read many more fully verified case studies demonstrating just how the Fire Safety Stick has saved the day in a variety of different situations from rallying and other motorsports, to around the home.

If one of your customers has a fire and have successfully used their Fire Safety Stick, be sure to tell us about it. Once verified, and we are able to do a full case study/story, we will replace their spent stick for FREE and you can share on a great marketing story.

# Additional Items Details

## Reseller Flyers

A5 Double sided Info Leaflet from template with specific reseller contact details on the front and reverse sides at the bottom.

Available variations:

- General
- Marine
- Car
- Motorsport
- Agriculture
- Trades (Plumbers & Electricians etc)

**CODES:**

**A5FlyerDSReseller500**

500 leaflets

**A5FlyerDSReseller1000**

1,000 Leaflets

**A5FlyerDSReseller2500**

2,500 Leaflets

## Fire Safety Stick On Board

**Code: ONBoardSticker**

White vinyl sticker custom cut to shape, gloss laminated with permanent adhesive.

Approximately 170mm x 62mm

## Floor Standing Display Unit

**Code: FSDU**

Supplied flat with easy assembly by hand (no glue or tape required.) Two flat shelves to hold many FSS50 & FSS100 units

Once completed dimensions are 37cm wide x 37cm deep x 161cm high.

Available with or without an additional display monitor. The QR code shown links back to product and demonstration videos on our website.

Standard header without optional display unit.

Header with optional display unit. NB the display unit can be added to the standard header at a later date if required.

Also comes with empty FSS display boxes to fill the shelves

# Additional Items Details

## Counter Top Point of Sale Display Unit

**CODE: CTDU-S**

Supplied flat with easy assembly by hand (no glue or tape required).  
Supplied with 3x empty FSS boxes - 37cm wide x 23cm deep x 40cm high.  
Available with or without an additional display monitor (**CODE: MON01**).  
The QR code shown links back to product and demonstration videos on our website. Also comes with empty FSS display boxes to fill the display

## USB Video Stick

**CODE: VidUSB01**

## Extra Single Clip

**CODE: MOUNT02**

## Belt Holster

**CODE: FSSAC03**

## Replacement Top Cap

**CODE: YellowTopCap**

## Replacement Bottom Striker (FSS50)

**CODE: SCB50**

## Replacement Bottom Striker (FSS100)

**CODE: SCB100**

## Flat Mount Wall Bracket (fits FSS50 & FSS100)

**CODE: MountJED3**

## Roll Bar Bracket (fits FSS50 & FSS100)

**CODE: MountJED1**

These 3-D printed brackets were developed for Rally Motorsport where the standard mounting clips may not be sufficient. As well as 2 semi-rigid clamps holding the stick, these are supplied with a velcro strap to secure it

# Additional Items Details

## Wall Sign Photo - Rigid Photo-Luminescent - CODE: WASP

(Glow-in-the-dark) Part of the FSSPRO3 kits, typically used in non-domestic buildings. Revised artwork, now suitable for either model. (no fixings included)

## Wall Sign Vinyl Sticker - CODE: Sign WaVi

Self-adhesive, also part of the FSSPRO2 kits, typically used with commercial vehicles Same artwork as above, suitable for either FSS50 or FSS100

## Tamper Tags - CODE: TT-01

Supplied Loose, used to secure the bottom striker cap to the handle to prevent loss of crucial striker cap. Part of the Utility/Agri-packs, and FSSPRO packs

## Tamper Tags Stickers - CODE: TTS-1

To be applied to tamper tags and used to mark off the regular maintenance inspections. Part of the FSSPRO packs.

## FSS Installation & QR Code Stickers - CODE: HS

To be applied to the handle - Part of the FSSPRO packs, indicating the installation date. Updated artwork so that single design works for both models. Also includes a QR for further guidance on recommended maintenance checks and the logging of those inspections.

## Reseller Agent Sampler Starter Pack - CODE: ASPK01

Demo stick  
(Non-functioning FSS)

## Additional Items Details

**Distributor Stickers for FSS Units - CODE: DistStkrFSS300**

*(Print only)*

These are a must have! 45x20mm vinyl stickers which allow the reseller to have their contact details on the sticks themselves. Will have the name of the business, email/phone (subject to space) The QR code will link directly to your own dedicated FSS Linktree page. These have already proven to lead to additional sales for the individual reseller.

The above code is just for the printing of 300x stickers, please allow 5 working days to be printed. They are held here at FSS offices. Then, when you order new FSS, we can then apply the stickers to your sticks before despatch. NB You must add the following product item to your order for the quantity of FSS ordered. We will advise when your stock of stickers is running low, ready to place a re-order to avoid any delays when you re-order more FSS units.

Supplied by  
**Fire Safety Stick**  
[FireSafetyStick.com](http://FireSafetyStick.com)

**Supplied by**  
**Fire Safety Stick**  
**FireSafetyStick.com**  
**+44 (0)1582 879529**

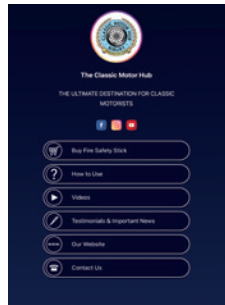

## Application of Distributor Sticker onto Fire Safety Sticks CODE: **DistStkrAPPLY**

**Personalised LinkTree**  
**(FREE OF CHARGE FOR ALL APPROVED DISTRIBUTORS)**

LinkTree (example shown belongs to one of our distributors), showing your company name, short one sentence description about your business, all of your social platforms, a link to your website, (optional to link straight to your FSS product page), and a link to your YouTube channel for all relevant videos such as How to Use & more.

Linktrees are accessible with the URL link and/or QR Code.

**Linktrees are a great way to give further information quickly to customers. If you're not sure of yours, contact us today!**

**Personalised Keyrings with LinkTree QR code & NFC chip -  
CODE: KEYRING1**

Clear plastic keyring with printed insert including approved distributors logo and QR code link direct to your dedicated FSS Linktree web page, set-up for the distributor. In addition, a NFC chip is installed and programmed to allow equipped smart phones link direct to their LinkTree webpage. These are produced in batches of 5 keyrings per approved distributor.

## FSS Maintenance Inspection log sheet

### FREE DOWNLOAD

Although the FSS doesn't need annual servicing, we do strongly recommend regular simple visual checks that can be carried out by the users themselves. PDF template of log book supplied  
(Contact us for quotes of printed log books)

Please see over for Bespoke Event Options, eg. table cloths, roller banner stands, and flags. These are special order items, costs and availability can vary.

## Notes:

- (1) Reseller flyers: These are standard double sided leaflets which have been adapted for the follow sectors: General / Agriculture/ Cars / Marine / Motor sport / Touring (Caravans and Motor homes). PDFs of which can be viewed within the FSS-Reseller folder. On both sides there is a space for company personalisation with logo, web and contact details. When ordering, please specify which version of the leaflet you required and the contact details to be added to bottom of each side. Allow approx. 7 working days for initial proof back to you for approval and then printing. These will be shipped to you direct from the printers.
- (2) The Point-of-Sale units (counter-top and floor standing units are designed with a removable cut-out area should a display unit be added either at the time of ordering or at a later date and empty/display FSS boxes. Available as Short holding 3x unit boxes and floor-standing holds 15+ unit boxes.
- (3) The USB stick can be supplied with a selection of videos demonstrating the effectiveness of the Fire Safety Stick and also includes the same video on the display unit.
- (4) The Flat Mount Bracket and now the roll bar mount (for both FSS50 and FSS100) are available from ourselves direct or direct from supplier email: jack@jed-engineering.com

## Ordering Process - For All Products

**All orders should always be emailed to [sales@firesafetystick.com](mailto:sales@firesafetystick.com)**  
(Not to individuals within our offices.)

Please ensure you have updated all prices, product details, including SKUs to match this updated catalogue. Of course, for the actual Fire Safety Sticks themselves, these prices are based upon your current discount banding. NB all prices shown in this catalogue are fixed prices and are not applicable to the various discount band. Upon receipt of your Purchase Order, we will then confirm with a Sales Order emailed back. Once we have full payment, we can then process the order ready for despatch. If you wish to make payment by credit/debit card, please let us know so that we can send the Invoice to you, this has a direct link on PDF invoice to our Payment Gateway system.

Simply email the team at [marketing@firesafetystick.com](mailto:marketing@firesafetystick.com) and we will work with you to ensure the right brand images and marketing message is produced to the correct specifications.

# Key Features of the Fire Safety Stick

The Fire Safety Stick is a totally different type of fire extinguisher, designed for a rapid response to small, early-stage fires. It works by chemically interfering with the oxygen at the flame level, thereby extinguishing the fire. However, it does not affect the users oxygen at all. It is certified to work on far more types of fires than other extinguishers, and does not leave a damaging mess or residue. Inside, prior to activation, it contains a solid resin therefore it is non-pressurised and does not need any servicing, during its 15 year life span. Once activated, the resin is broken down to Nitrogen (an inert gas), creating the aerosol to spray the active agent: potassium free radicals. Not only is it safe for the user, but also any nearby humans and animals, it is also completely safe for it's surrounding area, the environment and ozone layer.

There are two key models available FSS50 and FSS100, the only difference is that the FSS100 is a slightly longer length and heavier, but with double the discharge time (a min. 100 seconds compared to the min. 50 seconds for the FSS50). These two models can then be adapted depending on the likely location they are to be kept.

When activated, point the vapour directly to the base of the fire, allow the vapour to engulf the flames, no need to get too close, don't move the stick around too much, let the vapour do the work. If windy, try to make sure the wind is blowing from behind you. Keep pointing the stick at the fire during the complete discharge time, even if the fire appears to be out, the vapour causes no damage and will ensure the fire is out and remains extinguished while it is still discharging. If the fire is in a confined space, the FSS can be left activated, within the space to repress the fire, whilst the user escapes to safety. The vapours in that confined space will continue to fight the flames of the fire.

## Key Points for the Fire Safety Stick

### 15 Years Tested Shelf Life

Typically three times that of most traditional fire extinguishers.

### No Toxic Mess

Produces zero damaging mess after use - fine for machinery & electronics.

### Eco-Friendly & Safe For All

Safe for humans and animals with no environmental impact at all.

### Durable

Can be dropped, pierced, and cut, and it still works! But cannot be activated by accident.

### CE/UKCA Certified & Marked

Plus many worldwide accreditations.

### Size & Weight

FSS50: 215g, 27cm x 3cm  
FSS100: 365g, 33cm x 3cm,

### Leave to Repress the Fire

Long discharge time aids escape, or it can be left behind in a confined space to repress the fire.

### No Servicing

Unlike traditional extinguishers, only basic in-house visual maintenance checks are required.

**FSS100** 33cm 365g

**FSS50** 27cm 215g

**Common Diameter:**  
3cm

**The FSS is certified for the following fire classes:**

### Solid Combustibles

Plastic, Paper, Textiles

### Flammable Liquids

Oil, Petrol, Diesel, Alcohols

### Flammable Gases

Methane, Propane, Butane

### Electrical Fires (100k volts)

TVs, Computers, Kitchen Appl.

### Cooking Oils & Fats

Eg. In the kitchen

It is not suitable for coal, wooden log fires, or lithium battery fires.

## IMPORTANT

The Fire Safety Stick is intended only for use on small fires, before they become too established. Once a fire is established, it is no longer suitable to be dealt with by any type of handheld extinguisher. However, the Fire Safety Stick has the added advantage, once activated, of being left within a confined space or room. It will continue to discharge, slowing the spread of the fire without any persons still present.

## Reseller Reminders

Always remember to tell us if you have a potential additional reseller of the FSS that you can supply stock to. Firstly, we can ensure that they don't come to us direct, plus they must not start selling or marketing the FSS until they have signed the correct agreements and completed the onboarding process.

Please ensure you are only using the latest and correct images, logos and text on your websites and social media. These can be downloaded from the Reseller SharePoint, please contact marketing if you have any queries.
