

FireShield Coloured Universal Hose O-Ring

Product Specification Sheet

FireShield

Key Features

- Supplied in packs of 125
- Colour change confirms O-ring replacement
- Compatible with a wide range of extinguisher types
- Supports regulatory compliance and service tracking
- Ensures a secure hose seal to maintain pressure integrity
- Quick and easy to replace during routine servicing
- Range of colours with year-based colour rotation system to indicate the year an O-ring was replaced.

● Red – 2021 ● Blue – 2022 ● Yellow – 2023 ● Green – 2024 ● Orange – 2025 ● White – 2026

A direct replacement for the hose O-ring on most water, water additive, hydro spray, AFFF foam, dry powder, and wet chemical fire extinguishers. These coloured O-rings provide a quick visual confirmation that the O-ring has been replaced during annual maintenance, supporting compliance with fire safety servicing standards. Ideal for use alongside other consumable service parts to ensure full extinguisher functionality and reliability. Offered in a range of colours including, yellow, orange, red, green, blue & white. See the above year-based colour rotation for reference.
