

Product Specification Sheet

Key Features

- Supplied in packs of 125
- Colour change confirms O-ring replacement
- Compatible with a wide range of extinguisher types
- Supports regulatory compliance and service tracking
- Ensures a secure hose seal to maintain pressure integrity
- Quick and easy to replace during routine servicing
- Range of colours with year-based colour rotation system to indicate the year an O-ring was replaced.

● Red – 2021 ● Blue – 2022 ● Yellow – 2023 ● Green – 2024 ● Orange – 2025 ● White – 2026

Introducing our FireShield Coloured Universal Swivel Horn O-Ring which is a direct replacement O-ring designed for the swivel horn on most 2kg CO₂ fire extinguishers. Manufactured from durable, high-quality materials, these O-rings ensure a secure seal and proper horn function under pressure.

Coloured O-rings offer a quick visual reference to confirm annual replacement during scheduled maintenance, helping service technicians comply with fire safety regulations and inspection protocols. Each colour corresponds to a specific service year, supporting easy tracking and reducing the risk of missed or overdue maintenance.
