

FireShield Safety Pin Sleeves

Product Specification Sheet

FireShield

Key Features

- Tamper-evident design
- Must be broken to remove the safety pin
- Prevents accidental or unauthorised discharge
- Meets UK fire safety regulations
- Compatible with most fire extinguishers that use standard pin sizes
- Fast & tool-free installation
- Simple to apply during servicing or installation
- Durable & lightweight
- Made from robust yet flexible plastic that resists cracking or premature failure in operational environments
- Available in 4 colours: yellow, orange, green, blue
- Supplied in bulk

Our FireShield Safety Pin Sleeves provide a clear visual indication of extinguisher use or tampering, enhancing safety and inspection efficiency. Fitted securely over the safety pin, the sleeve must be broken before the pin can be removed, offering reliable tamper evidence and helping to prevent accidental or unauthorised discharge. These sleeves are compatible with FireShield extinguishers and a wide range of other models, depending on pin diameter. Ideal for routine maintenance, safety audits, and high-visibility compliance in commercial, industrial, and public-sector environments.
