# FireShield Universal 4mm Extinguisher Safety Pin & Indicator

## Product Specification Sheet

**FireShield**

## Key Features

- Compatible with most modern fire extinguisher models
- Available in 6 distinct colours for easy identification
- Weatherproof and corrosion-resistant for indoor and outdoor use
- Anti-magnetic material. Safe for use in sensitive environments
- Supplied in convenient packs of 25
- Provides clear visual indication of tampering or discharge
- Designed to fit through extinguisher valve handles for secure application
- Quick and easy to install without tools
- Manufactured in the UK

This pack of 25 FireShield Universal 4mm Fire Extinguisher Safety Pins with tamper indicators is designed to fit most modern fire extinguishers. Each pin is weatherproof, corrosion-resistant, and anti-magnetic, making them suitable for both indoor and outdoor environments, including sensitive areas such as hospitals or laboratories.
The integrated tamper indicator provides a clear visual cue if the extinguisher has been used or interfered with, supporting compliance during routine safety checks. Ideal for service engineers, facility managers, and safety professionals looking for a reliable and durable safety solution.
