FWBH203

FWBHR25 (ROLL)

- Advanced high silica fabric (Silica content $\geq 96\%$)
- Maximum protection for high-heat welding environments
- Built for intense, heavy-duty welding and cutting
- Temperature resistance up to 1000°C
- Also able to withstand 1100°C for a short duration
- Hemmed with high performance Kevlar thread
- Blankets contain eyelets
- Ideal for horizontal use, offers advanced slag and spatter protection
- Re-usable storage bag included

FIRECHIEF® HOT WORKS WELDING BLANKETS - HEAVY DUTY

FIRECHIEF®
making the world a safer place

The all-new range of welding blankets from Firechief® Global are designed for easy specification, based on the application.

From light-duty blankets, ideal for protecting against sparks from welding, to our heavy-duty blankets, which are performance-rated up to 1000°C, we've designed a compact, easy-to-navigate range to cover all applications.
